## WORK EXPERIENCE

### GardeshPay, Front End Developer

May 2022 - Present | Tehran, Iran

- Assisted with the bug fix and support of the existing secure websites like Channelead, Apro, and Bedcasting resulting in a 25% increase in user clicks and subsequently 30% in customer purchases.
- Enhanced a 15% increase in user experience by implementing new features based on user feedback.
- Reduced customer engagement by up to 10% by migrating a multiple-user experience into a single-page app.

### ProShot, Front End Team Lead

July 2021 - May 2022 | Tehran, Iran

- Improved productivity of a 4-member team by up to 40% by supervising and mentoring.
- Boosted the performance of the project to 35% by managing the refactoring process.
- Extended productivity to a 40% increase by conducting workload assessments and devising new operational processes.
- Adapted developers 30% easier as a result of documenting solution architecture for high-profile progressive web applications.
- Improved codebases by developing reusable components to speed up the project's development by up to 40% and decrease their maintainability time cost by 50% to 70%.

### Shaya, Front End Developer

September 2018 - May 2021 | Tehran, Iran

- Designed UI with Material components and smooth animations to obtain the company's standards and the increased average rate of user clicks by up to 40%.
- Raised customer purchases to 50% by coding the Kavan control admin panel.
- Increased team time by 40% by collecting data in an AI project.
- Cut down paperwork to 20% by re-designing the Adtrace project.
- Standardized existing secure websites up to 15% focused on user reviews.
- Communicated directly with Frontend, Backend, Android developers, UI/UX designers, and project managers through scrum framework to precisely achieve project goals in a +50 company.
